

Alternative Screenings

Automated tools to identify needs and ensure best possible outcomes

As inmate programming has come into focus for jails, your team needs the right resources to assess needs and craft the right plans. Removing subjectivity and room for error from the vital decisions your staff members make every day is key to driving data-backed solutions and programming.

With Alternative Screenings, you gain access to over 25 nationally recognized screenings relating to trauma, drug and alcohol use, history of violence, and more to understand backgrounds and pave pathways forward. These screenings save your team time and streamline internal decisions; they also help inmates understand their treatment plans.

Key Features

Brief Jail Mental Health, Suicide & PTSD screenings

PREA Profile Checklist & Containment Plan

Domestic Violence, Sex Offender, and Substance Abuse Screening Options

Immediate results and recommendations following all completions

State-specific risk screening integration capabilities

Evidence-based data considerations

With equivalent Corrections, your agency can:

- Secure nationally recognized screenings that cover nearly every possible inmate need
- Make informed decisions based on evidence-based data and recommendations
- Mitigate risk by removing subjectivity from decisions and plans
- Keep individualized needs at the center of your programming efforts
- Give time back to your staff by automating your screening process
- Clearly communicate and outline treatment plans to inmates

Better assessments mean better individualized plans to support the development and execution of treatment decisions.
