Custody Management

Streamlined corrections software for intake, facility, and inmate management

The standard "book & release" choices you have at your disposal today are likely severely outdated and lacking in proactive, productive ways to fully manage your facility and inmates to the best of your ability. You need validated resources built and managed by experienced professionals who have been where you are with the capability for reliable integrations, secure hosting, and more. Even more so, you need data to defend your operation and maximize your limited resources, all while keeping inmates and staff safe - and that's exactly what the Custody Management solution provides.

Through our streamlined system, every single piece of information that you need to set your inmates, staff, and facility up for success can be found in one place. With our Custody Management solution, you can take advantage of a better approach to custody management that incorporates advanced data analytics for operational transparency and policy compliance so that you can stay on track every step of the way.

Key Features

- Fast, flexible intake management
- Easily configurable
- Compliancy tools for PREA
- Medical, mental health, suicide, and PTSD screenings
- Comprehensive Program Management

- Compiles all vital information about inmates in one place
- Reporting and data analytics
- Automated sentence calculation
- Beginning to end classification management, including the only fully automated classification tool available to practitioners - the Decision Tree

With equivant Corrections, your agency can:

- Easily access historical data for any inmate, their charges and convictions, internal behavior, and more
- Coordinate workload for intake and classification processing
- Track notifications and warnings related to inmate status faster
- Easily access a visual jail layout that identifies potential issues within your facility
- Tie programming and work release oversight together using integrated tools
- See all pieces of custody connected in a single solution
- Save time and mitigate risk while relying on a validated, proven system

Upgrade your approach to custody management and run a safer, more efficient facility.
