

Services

All-encompassing support for integrating best-in-class software solutions for your facility

When your team is ready to implement game changing solutions within your agency, handling every last detail that comes with these large changes can be daunting. Between data migration and integration, keeping a pulse on if your day-to-day operations match up to your new workflows – and of course, the overall software implementation into your existing systems – you need experienced, trusted partners who have been in your shoes.

The equivant Corrections team is made up of former industry practitioners who have built, modified, and improved upon our software solutions and services to offer you a comprehensive partnership that positively impacts your facility. From research and validation studies to training every member of your team, the services offered to you are structured around getting you up and running as smoothly and efficiently as possible.

Key Features

Beginning to end project planning to ensure implementation is a success

Secure data interfaces that seamlessly integrate data across systems and sources

Data conversion capabilities to ensure historical data is brought forward to your new system

In-house academic research department available for validation studies and more

Full business process review offering to audit current systems and make recommendations

With equivant Corrections, your agency can:

- Have a knowledgeable and trusted partner for your all-important implementation
- Connect and combine all necessary data for operations and decision-making into one source
- Transfer all legacy data safely and securely for new custody systems
- Take advantage of industry experts for in-depth research and corrections consultation
- Put a personalized plan in place to guide your next steps forward

Depend on a proven team for oversight and management of making your software solution work for you.
