Classification Management

Automated objective classification processing and tracking for jails and detention centers

Your jail is responsible for keeping inmates safe and secure - no exceptions. Managing inmates properly from beginning to end is proven to improve jail safety and positively influence inmate behavior. You need validated resources built and managed by experienced professionals who have been where you are with the capability for reliable integrations, secure hosting, and more. Trusted classification management is the foundation of sound housing decisions and safer facilities.

equivant Corrections is nationally recognized as a premier classification management tool provider, with our solution being available to facilities across the U.S. With safety, efficiency, and accuracy as the backbone of our comprehensive software, you and your team are able to make faster, better housing and overall management decisions. Classification and reclassification tools are included in our all-inclusive platform, and support inmate housing decisions and planning.

Key Features
