

Secure Cloud Hosting

Access your data from anywhere, securely

The amount of sensitive information that corrections facilities' staff must safeguard and access at any point is immense. Encrypted, protected hosting of systems, solutions, and data is paramount to your operations.

At equivant Corrections, we provide hosting through Amazon Web Services (AWS) GovCloud in order to offer the highest level of data security to our customers while ensuring they can easily access their information from any mobile device. Our policies, procedures, and systems are designed to meet SOC-2 Type 2 standards to add an additional layer of confidence. We are committed to keeping your data available and safe for your optimized workflow.

Key Features

24/7 systems and security monitoring

Policies designed to the NIST 800 framework

Software patching schedules based on availability and security objectives

Encrypted data practices in line with the highest of industry standards

Fully automated backups

With equivant Corrections, your agency can:

- Take data security concerns off your plate and rely on best-in-class hosting services
- Integrate numerous agencies under one web-hosted location for seamless data sharing
- Support your team where they are, allowing them to work anywhere in a secure, trusted manner
- Save time and money by allowing the equivant Corrections support team to maintain updates
- Access all data and functionality without VPN access or IT intervention

Put your trust in best-in-class cloud-based hosting to keep your data protected and workflow optimized.
